RIGO Hydrocut 550 / 650 / 750 / 850 Hydraulic Guillotine

The Hydrocut hydraulic guillotine family is perfectly suited to the busy digital print shop or offset print house.

The machines come with the best safety features as standard and only operates at a very low noise level.

A touch screen eases the programming and operation of the machine. The back gauge is controlled by a microcontroller to always position the cut in the exact position. All of the Hydrocut guillottines can be optioned with an air table and side tables.

RIGO guillotines are manufactured in Hungary.

Technical Specs

Max Cutting Width	550mm / 650mm / 750mm / 850mm
Max Cutting Depth	550mm / 650mm / 750mm / 850mm
Min Cutting Depth	35mm
Max Cutting Height	80mm
Safety	Light Curtain and two button only operation
User Interface	Colour Touch Screen with job memory
Options	Side Tables and air table for all models

Installation Requirements

Power Requirements	240V Single Phase - 15A Capacity 2KW (550) - 3KW (650/750/850)
Weight:	550kg / 600kg / 650kg / 700kg
Dimensions (LxWxH)	840 x 1140 x 1470mm (Hydrocut 550) 970 x 1130 x 1470mm (Hydrocut 650) 1070 x 1430 x 1470mm (Hydrocut 650) 1170 x 1530 x 1470mm (Hydrocut 650)
Side Tables	add 860mm
